Dear Mrs. Wymore:

During our conversation on 02/06/08 you stated that you question a member of the public standing to ask that your client cease the transmission of junk faxes to a government facility. I believe the attached FCC NAL makes that a non-issue. Further, I suggest that you notify your client of the consequences of the conversion of government property. As an attorney of law you should be acutely aware that even politicians and certainly government vendors cannot advertise on government property.

My objective is still the same - that Protus IP Solutions stop transmitting their clients junk faxes to the 500+ fax machines at a government facility.

Just in case you may not have noted the exchanges I provided you they are 281 [REDACTED] 281 [REDACTED] and 281 [REDACTED]

I trust this email settles the matter.

Respectfully,
